SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

JANUARY, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It was originally proposed that the results of the Survey would be made available monthly, but difficulties encountered by many firms in adjusting their accounting systems to show the required provincial breakdowns, and other relevant problems, resulted in unavoidable delay in the preparation of figures for the early months. It is thought that the Survey is now well established, and, following the present release for the months of October, November and December, 1947, and for the month of January, 1948, figures will be released each month with a minimum of time lag.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and, indeed, should be considered chiefly as establishing a tentative check series for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipments Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

In Tables 2 and 3 the compilation of the monthly shipments of the firms reporting in the sample is shown by months together with the average monthly production of the same firms in 1946. Some indication of the wide variation in seasonal movements may be found in these tables, as for example, in the case of starters and growing mashers where the average monthly production (1946) is many times greater than the monthly shipments reported in October, November and December, 1947, due, it would appear to the fact that the total annual production of these items finds its way to the market almost entirely during a few months of the year.

Tables 4 - 7 show the figures of only the firms reporting in the sample Monthly Shipments Survey, by feeds and by Provinces. It must be particularly stressed that these quantity figures are not total, and should be taken as indicating only approximate percentage Provincial distribution and trends.

Data are also collected on inventories and utilization of grains, and consideration will be given to publishing these at a later date.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, JANUARY, 1948.

(x) The monthly coverage was increased in January, 1948, and a connected trend will commence with this month.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, JANUARY, 1948.

As will be observed from the grouping of items in the 1946 production column of the preceding table (table 2), the items available from the Annual Census of Industry production reports submitted by manufacturers differ in specification of items from those used in the Monthly Shipments Survey, i.e., poultry chick starter and turkey starter are shown separately on the Monthly Shipments Survey, whereas there is only a single general item for poultry starter, which would include turkey, on the Annual Production Schedule. The specification of items on the Annual Production Schedule can be ascertained from table 1, in which all figures are derived from that source. In table 2, the exact items of the Monthly Shipments Survey schedule are used, so that the summary of shipments by months will correspond exactly with the detailed data on shipments shown by months in tables 4-7. Because of this, only a single combined production figure for 1946 can be shown against the twelve shipments items for poultry and turkey feeds. In table 3, a supplementary comparison of 1946 production of poultry and turkey feeds, as against shipments, is given, the items on the latter being re-grouped to allow a greater number of comparisons.

Table 3. - Shipments of Prepared Poultry and Turkey Feeds by Firms reporting for the months of October, November and December, 1947, and January, 1948. (The itemized production during 1946 of the firms reporting, as shown in Section (D) of Table 1, has been converted from tons to cwt. and reduced to monthly averages. These averages are shown below in Column 1, by appropriate groups of items in order to establish comparability.)

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS
MARCH, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and, indeed, should be considered chiefly as establishing a tentative check series for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipments Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

Since it is not feasible to carry more than two months complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed or concentrate reported by the firms in the sample, for the months of October, 1947 - March, 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months October, 1947 - March, 1948. It is hoped that these two tables give enough historical material for ordinary purposes, but, in the event that complete detail is required prior to February, 1948, recourse can be had to the appropriate preceding reports.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of February and March, 1948.

In using Tables 2 - 5, it must be particularly noted that the quantity figures given are not total, and should be taken only as indicating approximate trends.

Data are also collected on inventories and utilization of grains, and consideration will be given to publishing these at a later date.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, MARCH, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS
APRIL, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and indeed, should be considered chiefly as establishing a tentative check series for monthly movements in the future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipments Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

Since it is not feasible to carry more than two months complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed or concentrate reported by the firms in the sample, for the months of October, 1947 - April, 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months October, 1947 - April, 1948. It is hoped that these two tables give enough historical material for ordinary purposes, but in the event that complete detail is required prior to March, 1948, recourse can be had to the appropriate preceding reports.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of March and April, 1948.

In using Tables 2 - 5, it must be particularly noted that the quantity figures given are not total, and should be taken only as indicating approximate trends.

Data are also collected on inventories and utilization of grains, and consideration will be given to publishing these at a later date.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

MAY, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and indeed, should be considered chiefly as establishing a tentative check series for monthly movements in the future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipments Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

Since it is not feasible to carry more than two months complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed or concentrate reported by the firms in the sample, for the months of October, 1947 - May, 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months October, 1947 - May, 1948. It is hoped that these two tables give enough historical material for ordinary purposes, but in the event that complete detail is required prior to April, 1948, recourse can be had to the appropriate preceding reports.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of April and May, 1948.

In using Tables 2 - 5, it must be particularly noted that the quantity figures given are not total, and should be taken only as indicating approximate trends. Data on inventories are included for the first time. Utilization of grain statistics which are also collected in this survey, will be published as soon as is feasible.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS
JUNE, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and indeed, should be considered chiefly as establishing a tentative check series for monthly movements in the future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipments Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

Since it is not feasible to carry more than two months complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed or concentrate reported by the firms in the sample, for the months of October, 1947 - June, 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months October, 1947 - June, 1948. It is hoped that these two tables give enough historical material for ordinary purposes, but in the event that complete detail is required prior to May, 1948, recourse can be had to the appropriate preceding reports.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of May and June, 1948.

In using Tables 2 - 5, it must be particularly noted that the quantity figures given are not total, and should be taken only as indicating approximate trends. Data on inventories are included for the first time. Utilization of grain statistics which are also collected in this survey, will be published as soon as is feasible,

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, JUNE, 1948.

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the Stocks of Milk Powder, Buttermilk Powder, and Whey Powder, held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, commencing with this issue, Stocks of these items are given in Table 7, immediately following.

However, it must be stressed that the totals do not represent Stocks held only by firms reporting in the sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all Stocks of Milk Powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 7. - Stocks of Milk powder, Buttermilk powder, and Whey powder held by all Firms in the Prepared Stock and Poultry Feed Industry, for the months of June and July, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS
JULY, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and indeed, should be considered chiefly as establishing a tentative check series for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipments Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

Since it is not feasible to carry more than two months complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed or concentrate reported by the firms in the sample, for the months of October, 1947 - July, 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months October, 1947 - July, 1948. It is hoped that these two tables give enough historical material for ordinary purposes, but in the event that complete detail is required prior to June, 1948, recourse can be had to the appropriate preceding reports.

Tables 4 and 5 show complete detail of feeds and concentrates shipped by provincial destinations, for the months of June and July, 1948.

In using Tables 2 - 5, it must be particularly noted that the quantity figures given are not total, and should be taken only as indicating approximate trends. Data on inventories are also included in this report. Utilization of grain statistics which are also collected in this survey, will be published as soon as is feasible.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, JULY, 1948.

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the Stocks of Milk Powder, Buttermilk Powder, and Whey Powder, held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, included in this issue, Stocks of these items are given in Table 7, immediately following.

However, it must be stressed that the totals do not represent Stocks held only by firms reporting in the sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all Stocks of Milk Powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 7. - Stocks of Milk powder, Buttermilk powder, and Whey powder held by all Firms in the Prepared Stock and Poultry Feed Industry, for the months of June, July and August. 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS
AUGUST, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and indeed, should be considered chiefly as establishing a tentative check series for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipments Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

Since it is not feasible to carry more than two months complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed or concentrate reported by the firms in the sample, for the months of November, 1947 - August, 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds or concentrates, by provincial destinations, for the months October, 1947 - August, 1948. It is hoped that these two tables give enough historical material for ordinary purposes, but in the event that complete detail is required prior to July, 1948, recourse can be had to the appropriate preceding reports.

Tables 4 and 5 show complete detail of feeds and concentrates shipped by provincial destinations, for the months of July and August, 1948.

In using Tables 2 - 5, it must be particularly noted that the quantity figures given are not total, and should be taken only as indicating approximate trends. Data on inventories are also included in this report. Utilization of grain statistics which are also collected in this survey, will be published as soon as is feasible.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, AUGUST, 1948

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the Stocks of Milk Powder, Buttermilk Powder, and Whey Powder, held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, included in this issue, Stocks of these items are given in Table 7, immediately following.

However, it must be stressed that the totals do not represent Stocks held only by firms reporting in the sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all Stocks of Milk Powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 7. - Stocks of Milk powder, Buttermilk powder, and Whey powder held by all Firms in the Prepared Stock and Poultry Feed Industry, for the months of June - September, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS
SEPTEMBER, 1948

In October, 1947, the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing a provincial destinations, together with export shipments. The Survey was established on a sample basis, the coverage intended being about 80 per cent of the production reported to the Census of Industry for 1946 by manufacturers classified under the prepared stock and poultry feeds industry. The production relationship was adopted because no shipments data were available. The year 1946 was used because 1947 production figures will not be available for some considerable time.

It must be clearly understood that no reliable check data exists in connection with the provincial distribution of shipments and that there is no prior record of the seasonal variation in shipments of individual feeds. Also, the percentage coverage of the Survey, being established on a production basis, may not be valid in individual months, since the relationship of the shipments of the firms comprised in the sample, to the total shipments of all firms in the industry, may vary considerably from the annual production relationship. Therefore, the figures must be used with caution, and indeed, should be considered chiefly as establishing a tentative check series for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, taken from the annual Census of Industry reports, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the current monthly shipment Survey, and is intended to be useful in indicating relationships in coverage. It will be noted that, although the general coverage approximates the original intention, coverage of certain individual items is low. The enlargement of the sample to cover all items more fully will be proceeded with from month to month until the situation is satisfactory.

Since it is not feasible to carry more than two months complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed or concentrate reported by the firms in the sample, for the months of December, 1947 - September, 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds or concentrates, by provincial destinations, for the months October, 1947 - September, 1948. In the event that complete detail is required prior to August, 1948 recourse can be had to the appropriate preceding reports.

Tables 4 and 5 show complete detail of feeds and concentrates shipped by provincial destinations, for the months of August and September, 1948.

Table 6 shows the Stocks of Prepared Stock and Poultry Feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds, for the Months of January - September, 1948.

Table 7 presents the Stocks of Milk, Buttermilk, and Whey Powder held by ALL firms in the Prepared Stock and Poultry Feeds Industry, for the months of June - October, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, SEPTEMBER, 1948

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the Stocks of Milk Powder, Buttermilk Powder, and Whey Powder, held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, included in this issue, Stocks of these items are given in Table 7, immediately following.

However, it must be stressed that the totals do not represent Stocks held only by firms reporting in the sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all Stocks of Milk Powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 7. - Stocks of Milk powder, Buttermilk powder, and Whey powder held by ALL firms in the Prepared Stock and Poultry Feed Industry, for the months of June - October, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

OCTOBER 1948

In October 1947 the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. This survey was established on a Sample basis, the coverage being approximately 80 per cent of the 1946 production reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. Production figures for 1946 were used because 1947 production figures are not yet available.

It must be clearly understood that no reliable check data exists in connection with provincial distribution of shipments and there is no prior record of the seasonal variation in shipments of individual feeds. Therefore, these figures must be used with caution and should be considered chiefly as establishing a tentative check series, or trend, for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Since it is not feasible to carry more than two months' complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments, or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, October 1947 - October 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, October 1947 - October 1948. In the event that complete detail is required prior to September 1948, recourse can be had to the appropriate preceding report.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of September and October, 1948.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months, January - October, 1948.

Table 7 gives for the first time the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August - October, 1948.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feed Industry, for the months, June - November, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, OCTOBER 1948

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and commencing with this issue, figures on the consumption of these grains are given in Table 7, immediately below.

Table 7. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August - October, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, OCTOBER 1948

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, included in this issue, stocks of these items are given in Table 8, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 8. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by ALL firms in the Prepared Stock and Poultry Feed Industry for the Months, June - November 1948.

Month	Milk	Powder	Whey
		Buttermilk

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

NOVEMBER 1948

In October 1947 the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. This survey was established on a Sample basis, the coverage being approximately 80 per cent of the 1946 production reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. Production figures for 1946 were used because 1947 production figures are not yet available.

It must be clearly understood that no reliable check data exists in connection with provincial distribution of shipments and there is no prior record of the seasonal variation in shipments of individual feeds. Therefore, these figures must be used with caution and should be considered chiefly as establishing a tentative check series, or trend, for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Since it is not feasible to carry more than two months' complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2. shows shipments, or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, November 1947 - November 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, October 1947 - November 1948. In the event that complete detail is required prior to September 1948, recourse can be had to the appropriate preceding report.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of October and November, 1948.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months, January - November, 1948.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August - November, 1948.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feed Industry, for the months, June - December, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, NOVEMBER 1948

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

Table 7. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August - November, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS, NOVEMBER 1948

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, stocks of these items are given in Table 8, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

DECEMBER 1948

In October 1947 the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. This survey was established on a Sample basis, the coverage being approximately 80 per cent of the 1946 production reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. Production figures for 1946 were used because 1947 production figures are not yet available.

It must be clearly understood that no reliable check data exists in connection with provincial distribution of shipments and there is no prior record of the seasonal variation in shipments of individual feeds. Therefore, these figures must be used with caution and should be considered chiefly as establishing a tentative check series, or trend, for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Since it is not feasible to carry more than two months' complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, December 1947 - December 1948, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, October 1947 - December 1948. In the event that complete detail is required prior to November 1948, recourse can be had to the appropriate preceding report.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of November and December, 1948.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months, January - December, 1948.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August - December, 1948.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feed Industry, for the months, June - December, 1948 and January 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

Table 7. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August - December, 1948.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS.

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, stocks of these items are given in Table 8, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, Although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 8. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by ALL firms in the Prepared Stock and Poultry Feed Industry for the Months, June - December 1948 and January, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

JANUARY, 1949

In October 1947 the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. This survey was established on a Sample basis, the coverage being approximately 80 per cent of the 1946 production reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. Production figures for 1946 were used because 1947 production figures are not yet available.

It must be clearly understood that no reliable check data exists in connection with provincial distribution of shipments and there is no prior record of the seasonal variation in shipments of individual feeds. Therefore, these figures must be used with caution and should be considered chiefly as establishing a tentative check series, or trend, for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Since it is not feasible to carry more than two months' complete detail in each report, Tables 2 and 3 present summary material for all available months. Table 2 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, January 1948 - January 1949, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, November 1947 - January 1949. In the event that complete detail is required prior to December 1948, recourse can be had to the appropriate preceding report.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of December 1948 and January 1949.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months, January - December 1948 and January 1949.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August - December 1948 and January 1949.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feed Industry, for the months, June - December 1948 and January - February 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

Table 7. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August - December, 1948, and January, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and, stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks or Prepared Stock and Poultry Feeds, Although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

February, 1949

In October 1947 the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. This survey was established on a Sample basis, the coverage being approximately 80 per cent of the 1946 production reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. Production figures for 1946 were used because 1947 production figures are not yet available.

It must be clearly understood that no reliable check data exists in connection with provincial distribution of shipments and there is no prior record of the seasonal variation in shipments of individual feeds. Therefore, these figures must be used with caution and should be considered chiefly as establishing a tentative check series, or trend, for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Since it is not feasible to carry more than two months' complete detail in each report, Table 2 and 3 present summary material for all available months. Table 2 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, February 1948 - February 1949, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, December 1947 - February 1949. In the event that complete detail is required prior to January 1949, recourse can be had to the appropriate preceding report.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of January 1949 and February 1949.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months, February 1948 - February 1949.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August - 1948 - February 1949.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feed Industry, for the months, June - December 1948 and January - March 1949.

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

Table 7. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August 1948.- February, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 8. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by ALL Firms in the Prepared Stock and Poultry Feed Industry for the months, June - December 1948 and January - March, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

MARCH, 1949

In October 1947 the Dominion Bureau of Statistics commenced a Monthly Survey of shipments in Canada of prepared stock and poultry feeds, showing provincial destinations, together with export shipments. This survey was established on a Sample basis, the coverage being approximately 80 per cent of the 1946 production reported by manufactures classified under the Prepared Stock and Poultry Feeds Industry. Production figures for 1946 were used because 1947 production figures are not yet available.

It must be clearly understood that no reliable check data exists in connection with provincial distribution of shipments and there is no prior record of the seasonal variation in shipments of individual feeds. Therefore, these figures must be used with caution and should be considered chiefly as establishing a tentative check series, or trend, for monthly movements in future years.

Table 1 shows the 1946 production of prepared stock and poultry feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Since it is not feasible to carry more than two months complete detail in each report, Table 2 and 3 present summary material for all available months. Table 2 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample of the months, March 1948 - March 1949, without detail of provincial destination. Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, January 1948 - March 1949. In the event that complete detail is required prior to January 1949, recourse can be had to the appropriate preceding report.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of February 1949 and March 1949.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months, March 1948 - March 1949.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August - 1948 - March 1949.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feeds Industry, for the months, June - December 1948 and January - April 1949.

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Month Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 8, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS
APRIL, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are figures on shipments of Prepared Stock and Poultry Feeds to Newfoundland. It must be clearly understood however, that as there are no Newfoundland manufacturers of Prepared Feeds taking part in this survey at present, these figures represent only shipments to this province, by Feed manufacturers in other provinces, who in previous months had reported these shipments as Export Sales.

Table 1 shows the 1947 production of Prepared Stock & Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 2 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, April 1948 - April 1949, without detail of provincial destination.

Table 3 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, February 1948 - April 1949.

Table 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of March 1949 and April 1949.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of April 1948 - April 1949.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August 1948 - April 1949.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feed Industry, for the months, June 1948 - May 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Month Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 8, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

MAY, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are figures on shipments of Prepared Stock and Poultry Feeds to Newfoundland. It must be clearly understood, however, that as there are no Newfoundland manufacturers of Prepared Feeds taking part in this survey at present, these figures represent only shipments to this province, by Feed manufacturers in other provinces, who in previous months had reported these shipments as Export Sales.

Table 1 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 2 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, May, 1948 - May, 1949, without detail of provincial destination.

Table 3 represents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, March, 1948 - May, 1949.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of May, 1949 and April, 1949.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of May, 1948 - May, 1949.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August, 1948 - May, 1949.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feeds Industry for the months, June, 1948 - June, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 8, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

JUNE, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are figures on shipments of Prepared Stock and Poultry Feeds to Newfoundland. It must be clearly understood, however, that as there are no Newfoundland manufacturers of Prepared Feeds taking part in this survey at present, these figures represent only shipments to this province, by Feed manufacturers in other provinces, who in previous months had reported these shipments as Export Sales.

Table 1 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 2 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, June, 1948 - June, 1949, without detail of provincial destination.

Table 3 represents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, April, 1948 - June, 1949.

Tables 4 and 5 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of May, 1949 and June, 1949.

Table 6 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of June, 1948 - June, 1949.

Table 7 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August, 1948 - June, 1949.

Table 8 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feeds Industry for the months, June, 1948 - July, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 7, immediately below.

Table 7. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August, 1948 - June, 1949

Month	G r a i n s						TOTAL

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 8, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 8. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by All Firms in the Prepared Stock and Poultry Feed Industry for the months, June, 1948 - July, 1949

	Powder		
	Milk	Buttermilk	Whey

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

JULY, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are three diagrams which are intended to be of use and interest to all Feed manufacturers. Diagram one (page 2) shows separately the Shipments of Prepared Feeds and Concentrates in the year 1948 and to date for the year 1949. Diagram two (page 22) presents the Shipments of Prepared Stock and Poultry Feeds and Concentrates in total for the year 1948, while diagram three (page 23) presents this some information to date for the year 1949.

Table 1 presents the Total production of Prepared Stock and Poultry Feeds in Canada and also by Economic Areas for the year 1947.

Table 2 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 3 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, July, 1948 - July, 1949, without detail of provincial destination.

Table 4 represents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, May, 1948 - July, 1949.

Tables 5 and 6 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of June, 1949 and July, 1949.

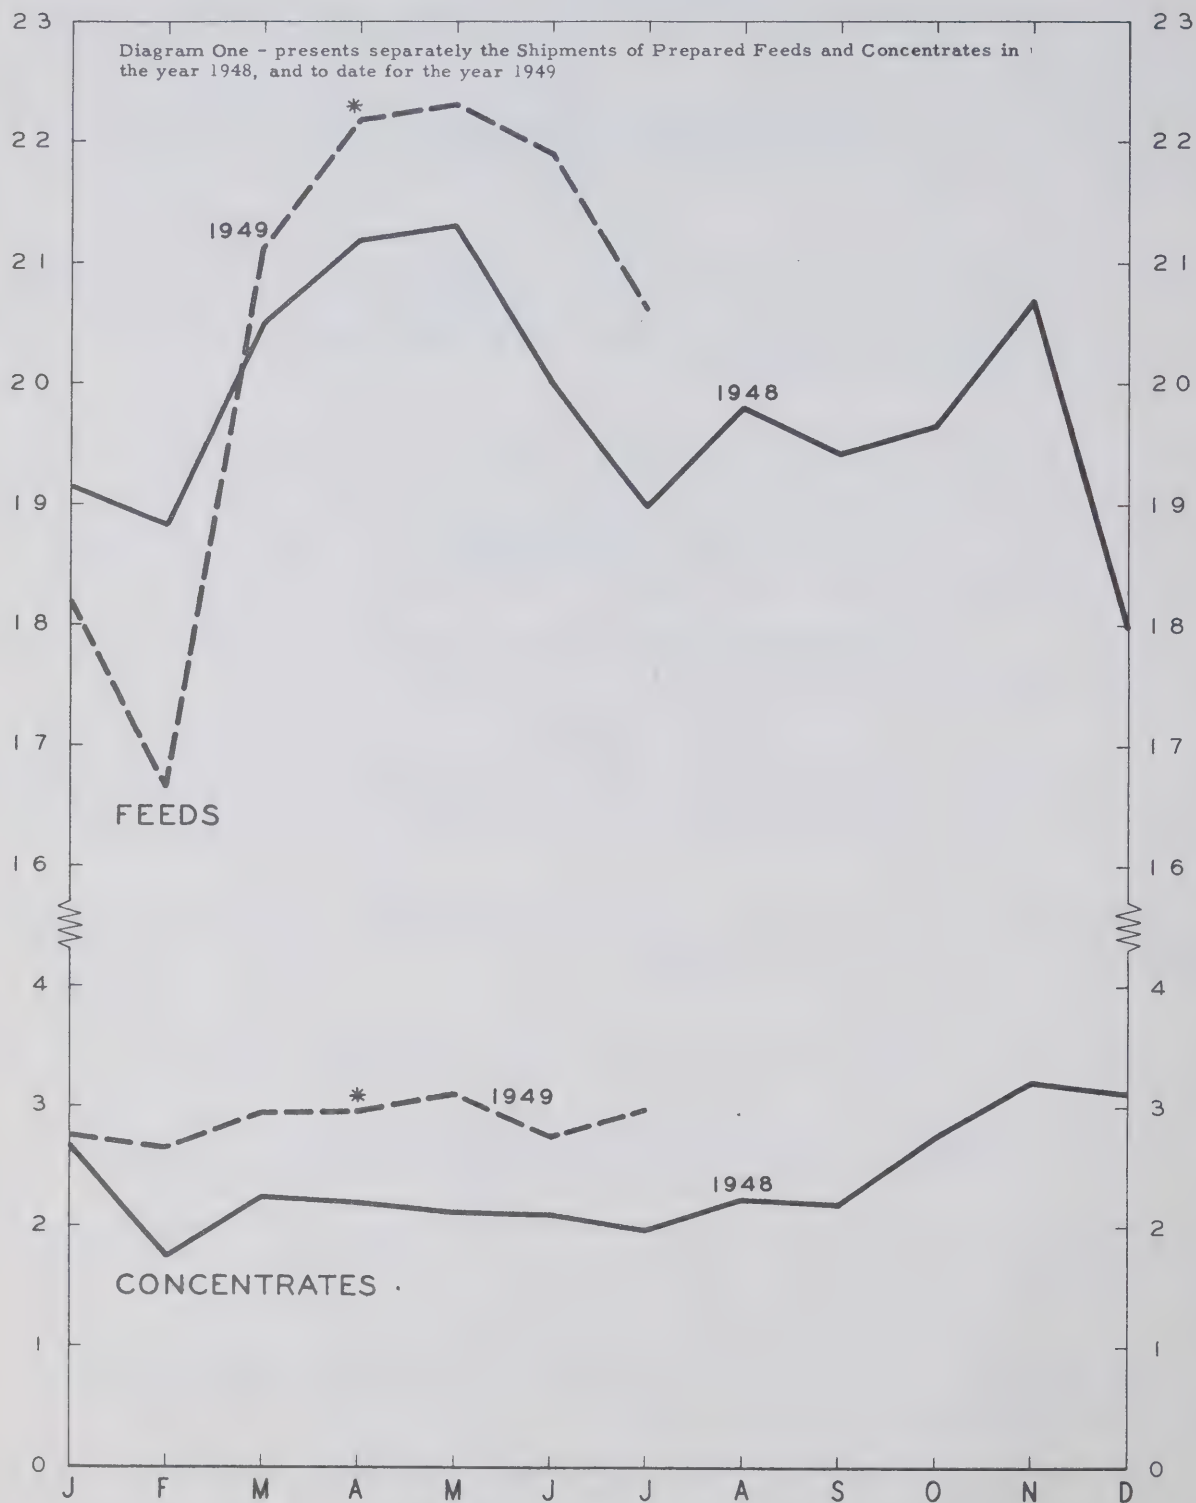

Table 7 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of July, 1948 - July, 1949.

Table 8 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August, 1948 - July, 1949.

Table 9 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feeds Industry for the months, June, 1948 - July, 1949.

MONTHLY SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS AND CONCENTRATES, 1948-1949

HUNDREDS OF THOUSANDS OF CWTs.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and, figures on the consumption of these grains are given in Table 8, immediately below.

Table 8. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August, 1948 - July, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

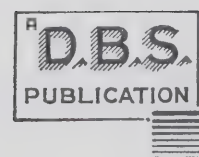

Table 9. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by All Firms in the Prepared Stock and Poultry Feed Industry for the months, June, 1948 - Aug. 1949

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

AUGUST, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are three diagrams which are intended to be of use and interest to all Feed manufacturers. Diagram one (page 2) shows separately the Shipments of Prepared Feeds and Concentrates in the year 1948 and to date for the year 1949. Diagram two (page 22) presents the Shipments of Prepared Stock and Poultry Feeds and Concentrates in total for the year 1948, while diagram three (page 23) presents this same information to date for the year 1949.

Table 1 presents the Total production of Prepared Stock and Poultry Feeds in Canada and also by Economic Areas for the year 1947.

Table 2 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 3 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, August, 1948 - August, 1949, without detail of provincial destination.

Table 4 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, June, 1948 - August, 1949.

Tables 5 and 6 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of August, 1949 and July, 1949.

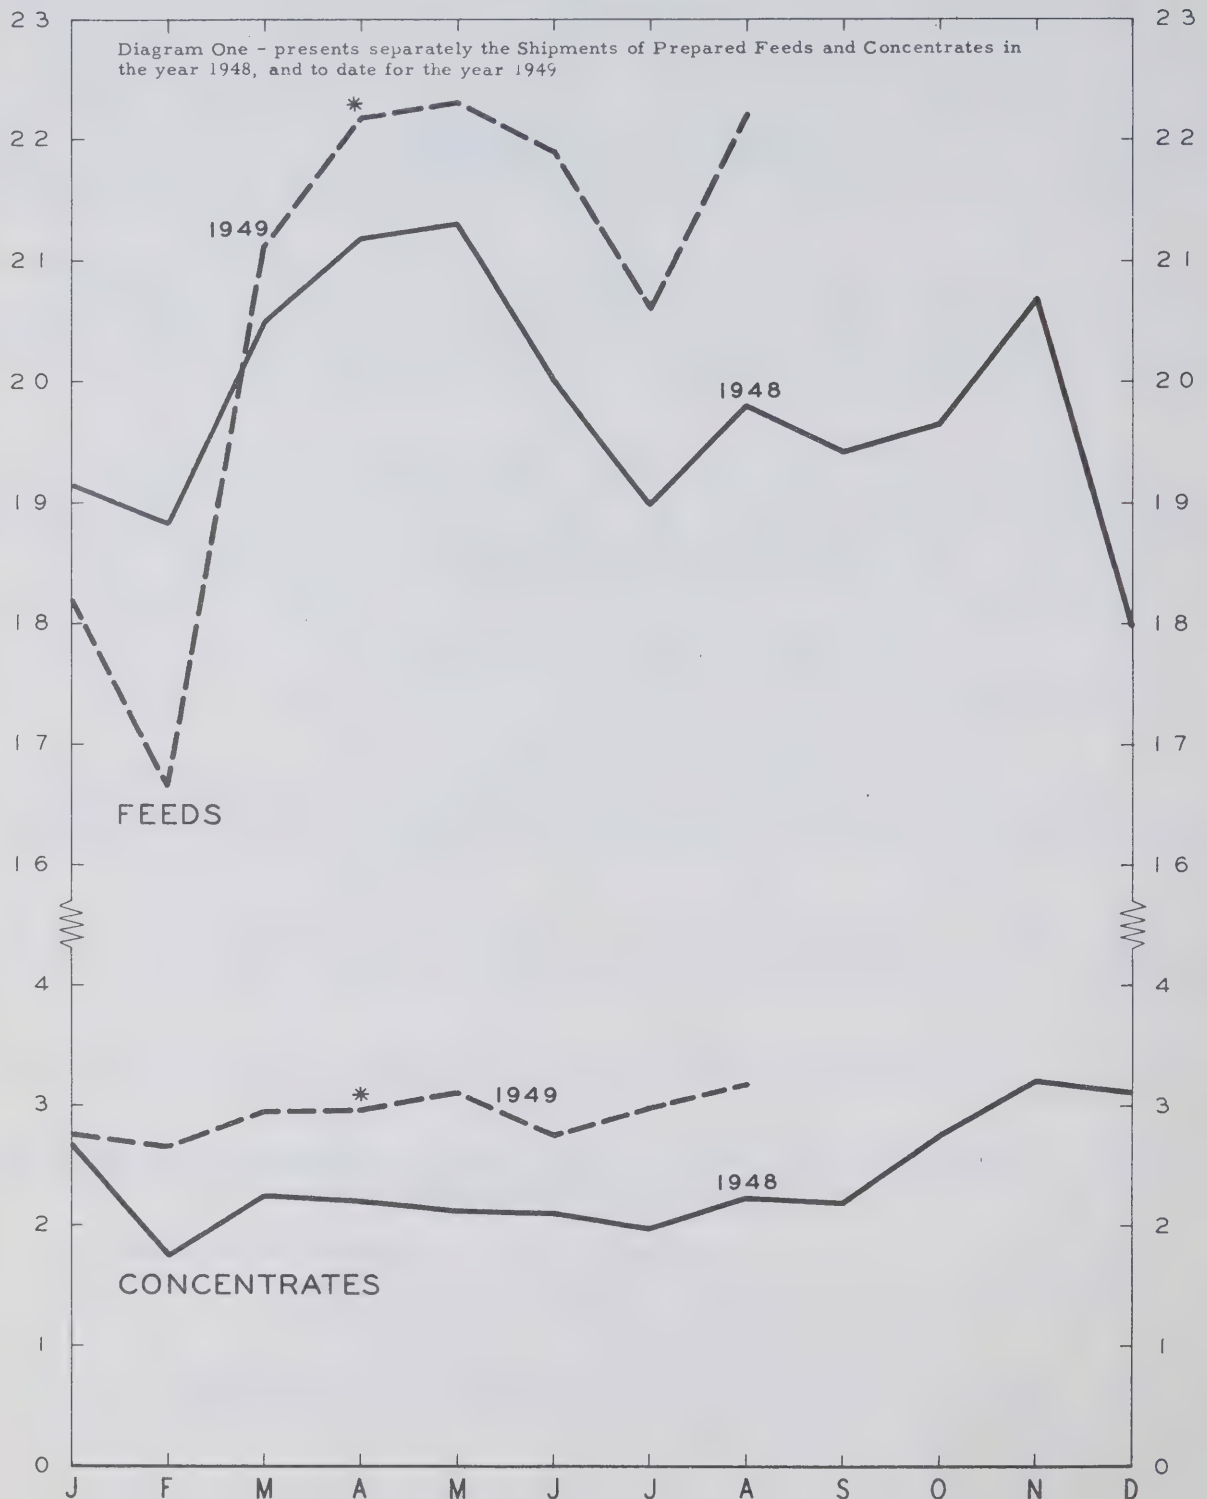

Table 7 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of August, 1948 - August, 1949.

Table 8 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August, 1948 - August, 1949.

Table 9 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feeds Industry for the months, June, 1948 - September, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and figures on the consumption of these grains are given in Table 8, immediately below.

Table 8. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August, 1948 - August, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 9. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by All Firms in the Prepared Stock and Poultry Feed Industry for the months, June, 1948 - September, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

SEPTEMBER, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are three diagrams which are intended to be of use and interest to all Feed manufacturers. Diagram one (page 2) shows separately the Shipments of Prepared Feeds and Concentrates in the year 1948 and to date for the year 1949. Diagram two (page 22) presents the Shipments of Prepared Stocks and Poultry Feeds and Concentrates in total for the year 1948, while diagram three (page 23) presents this same information to date for the year 1949.

Table 1 presents the Total production of Prepared Stock and Poultry Feeds in Canada and also by Economic Areas for the year 1947.

Table 2 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 3 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, September, 1948 - September, 1949, without detail of provincial destination.

Table 4 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, July, 1948 - September, 1949.

Tables 5 and 6 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of September, 1949 and August, 1949.

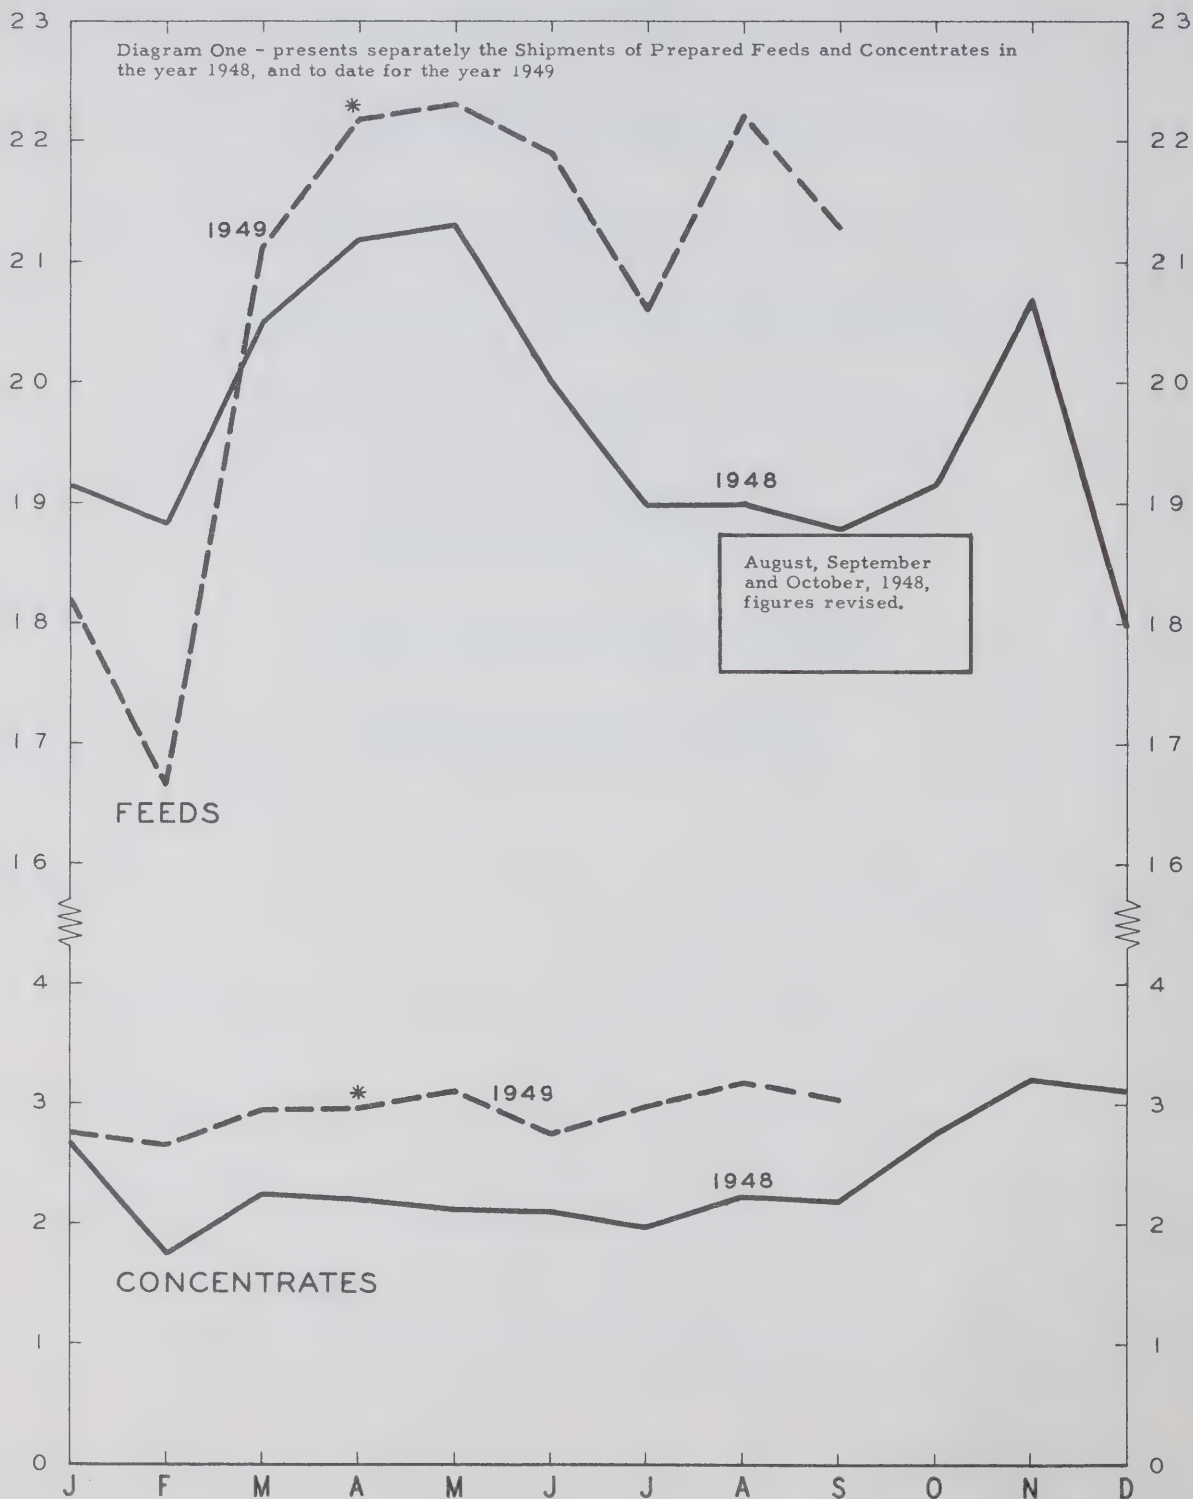

Table 7 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of September, 1948 - September, 1949.

Table 8 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey, for the months, August, 1948 - September, 1949.

Table 9 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feeds Industry for the months, June, 1948 - October, 1949.

MONTHLY SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS AND CONCENTRATES, 1948-1949

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and figures on the consumption of these grains are given in Table 8, immediately below.

Table 8. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August, 1948 - September, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 9. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by All Firms in the Prepared Stock and Poultry Feed Industry for the months, June, 1948 - October, 1949.

of the Industry and Merchandising Division,
Dominion Bureau of Statistics, Ottawa

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

OCTOBER, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are three diagrams which are intended to be of use and interest to all Feed manufacturers. Diagram one (page 2) shows separately the Shipments of Prepared Feeds and Concentrates in the year 1948 and to date for the year 1949. Diagram two (page 22) presents the Shipments of Prepared Stocks and Poultry Feeds and Concentrates in total for the year 1948, while diagram three (page 23) presents this same information to date for the year 1949.

Table 1 presents the Total production of Prepared Stock and Poultry Feeds in Canada and also by Economic Areas for the year 1947.

Table 2 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 3 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, October, 1948 - October, 1949, without detail of provincial destination.

Table 4 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, August, 1948 - October, 1949.

Tables 5 and 6 show complete detail of feeds and concentrates shipped, by provincial destinations, for the months of October, 1949 and September, 1949.

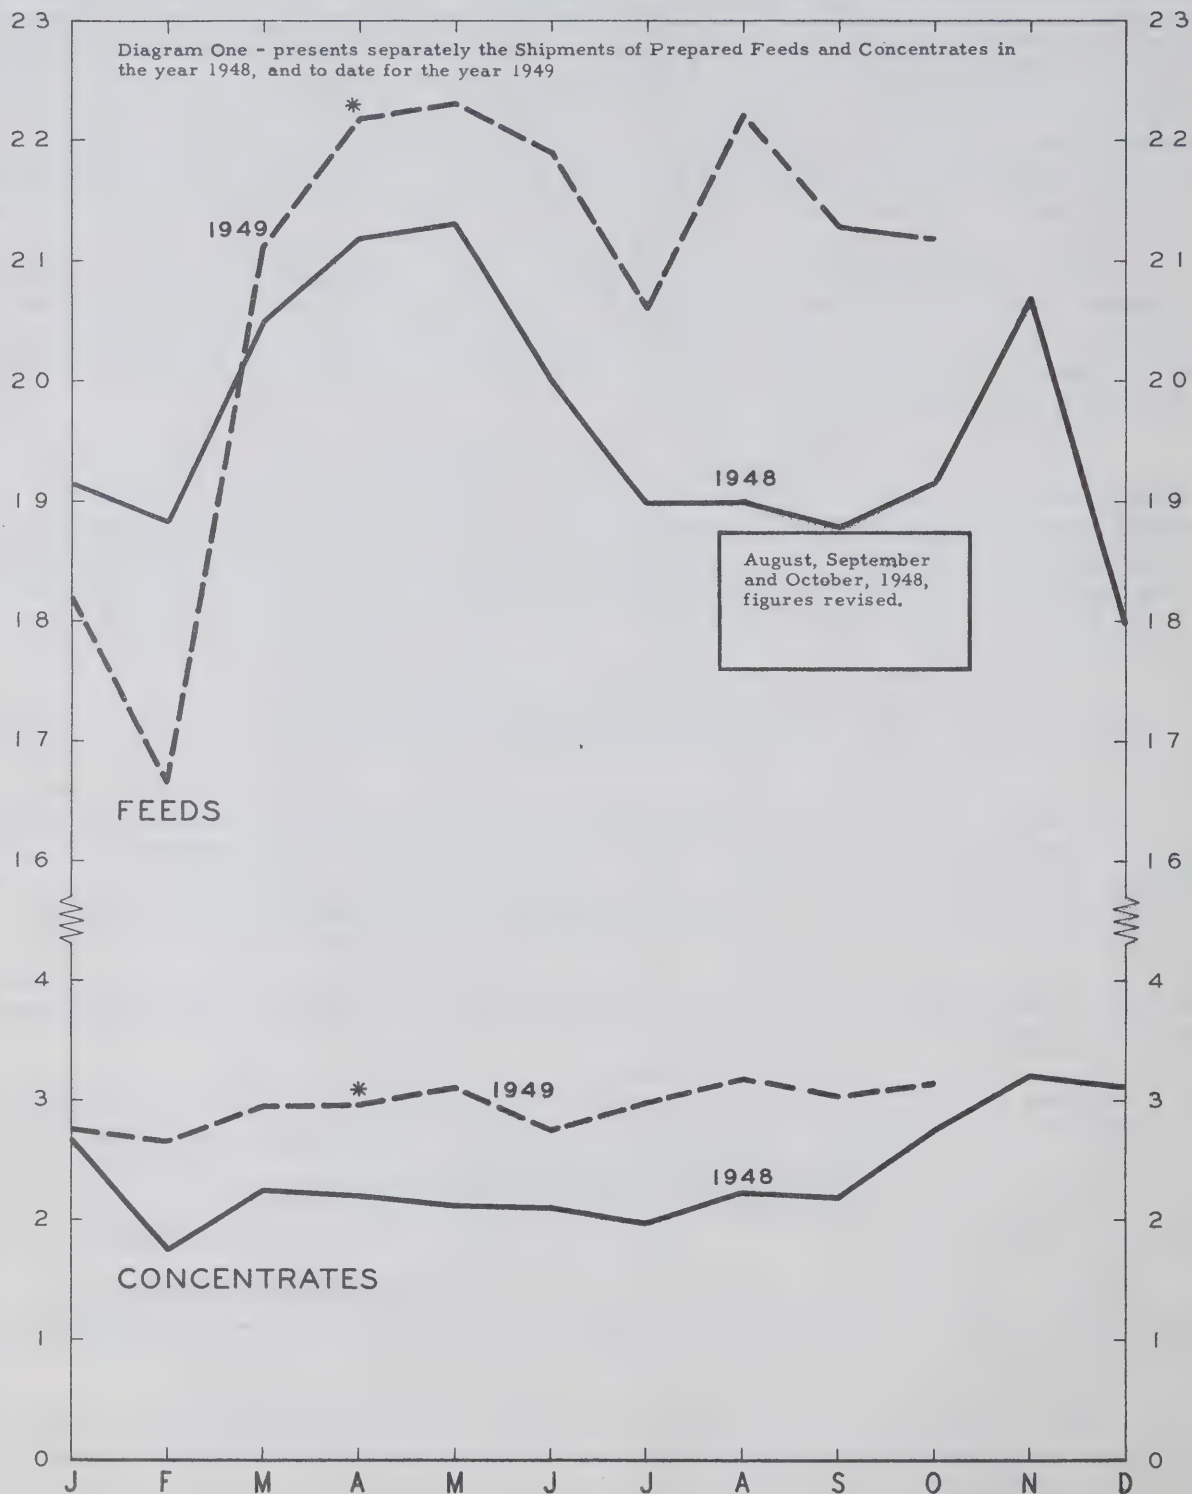

Table 7 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of October, 1948 - October, 1949.

Table 8 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey for the months, August, 1948 - October, 1949.

Table 9 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stock and Poultry Feeds Industry for the months, June, 1948 - November, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and figures on the consumption of these grains are given in Table 8, immediately below.

Table 8. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August, 1948 - October, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 9. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held by All Firms in the Prepared Stock and Poultry Feed Industry for the months, June, 1948 - November, 1949.

Minister of Trade and Commerce

Prepared in the General Manufactures Section
of the Industry and Merchandising Division,
Dominion Bureau of Statistics, Ottawa

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS NOVEMBER, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are three diagrams which are intended to be of use and interest to all Feed manufacturers. Diagram one (page 2) shows separately the Shipments of Prepared Feeds and Concentrates in the year 1948 and to date for the year 1949. Diagram two (page 22) presents the Shipments of Prepared Stocks and Poultry Feeds and Concentrates in total for the year 1948, while diagram three (page 23) presents this same information to date for the year 1949.

Table 1 presents the Total production of Prepared Stock and Poultry Feeds in Canada and also by Economic Areas for the year 1947.

Table 2 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 3 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, November, 1948 - November, 1949, without detail of provincial destination.

Table 4 presents the shipments of related groups of feeds, or concentrates, by provincial destinations, for the months, September, 1948 - November, 1949.

Tables 5 and 6 show complete detail of feeds and concentrates shipped by provincial destinations, for the months of November, 1949 and October, 1949.

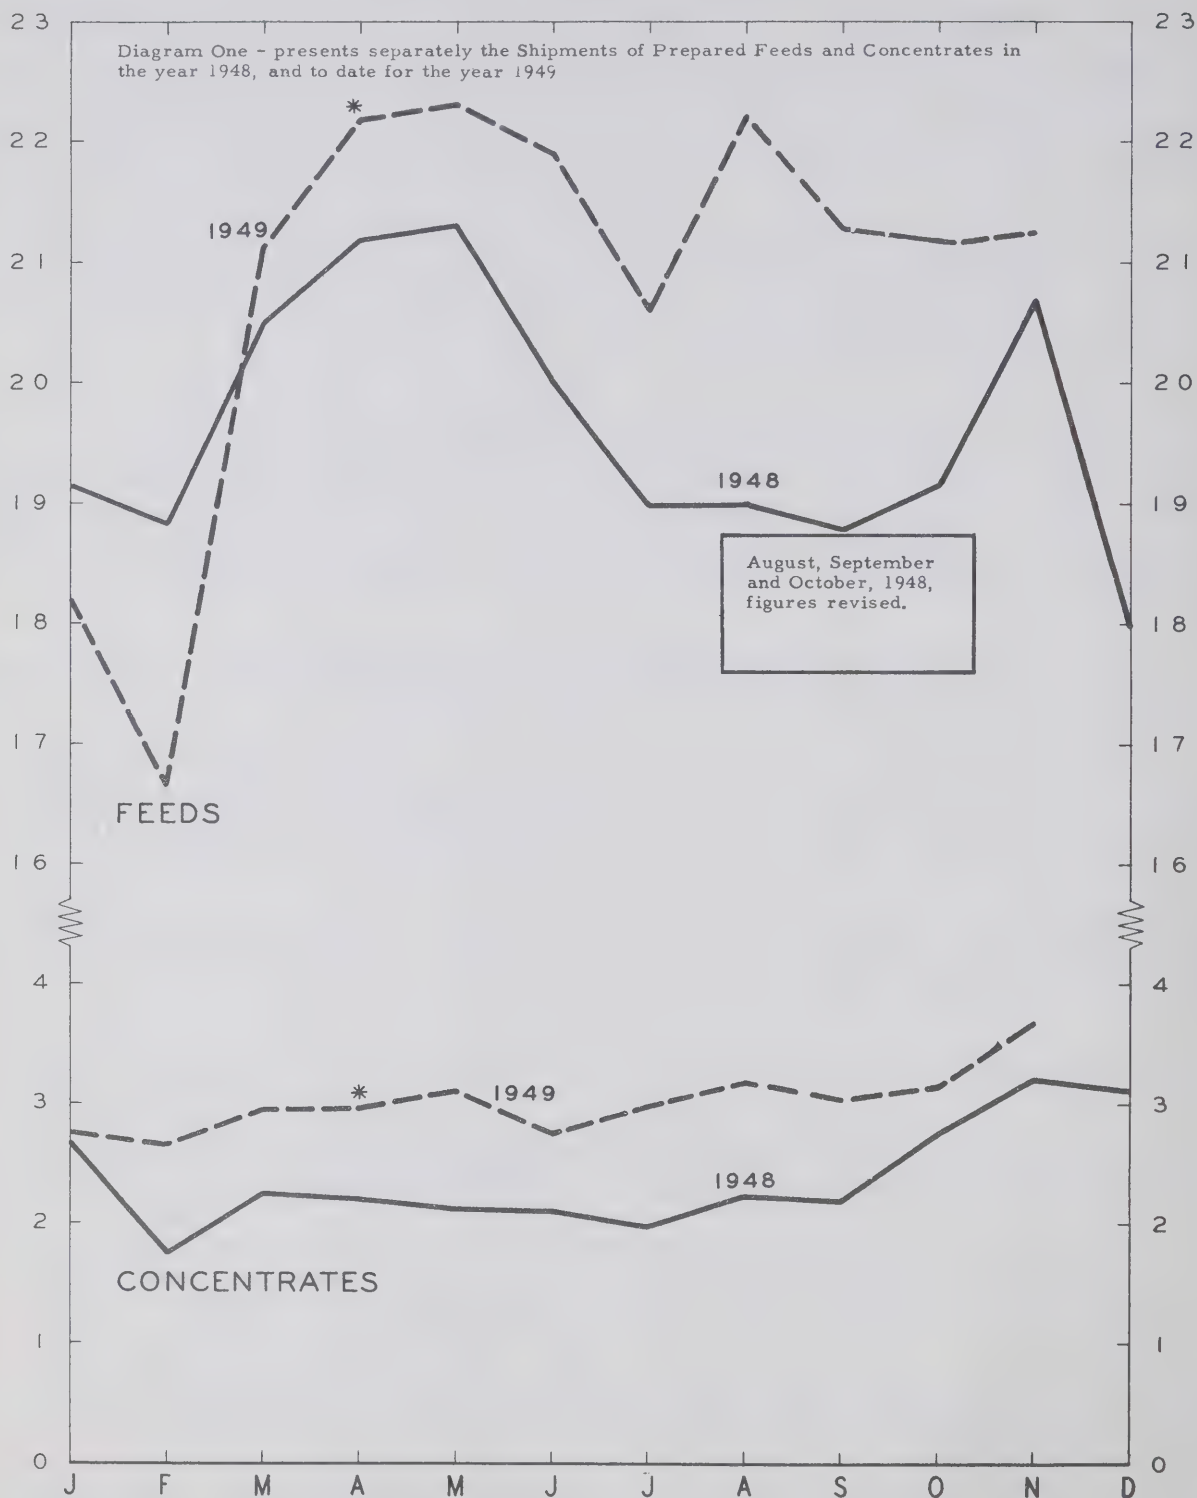

Table 7 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of November, 1948 - November, 1949.

Table 8 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey for the months, August, 1948 - November, 1949.

Table 9 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stocks and Poultry Feeds Industry for the months, July, 1948 - December, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and figures on the consumption of these grains are given in Table 8, immediately below.

Table 8. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August, 1948 - November, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 9. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held
By All Firms in the Prepared Stock and Poultry Feed Industry
for the months, July, 1948 - December, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

DECEMBER, 1949

In October, 1947, the Dominion Bureau of Statistics, in cooperation with the National Council of the Canadian Feed Manufacturers Association, commenced a Survey on a sample basis, of Shipments of Prepared Stock and Poultry Feeds, showing both Export shipments as well as Provincial destinations in Canada. The coverage of this Sample survey is approximately 83 per cent of the total 1947 production, reported by manufacturers classified under the Prepared Stock and Poultry Feeds Industry. In conjunction with this Shipments survey, figures were also collected on Inventories of Prepared Feeds at the end of each month, and the consumption of various grains used in making Prepared Feeds during each month.

It is in 1949 that this survey on Shipments commences to have real value, as there is a basis for comparing the current months with the corresponding months of the previous year. It will be several years, however, before sufficient monthly data is accumulated, with which to work out accurate seasonal trends in Provincial Shipments and Inventories.

Included in this publication are three diagrams which are intended to be of use and interest to all Feed manufacturers. Diagram one (page 2) shows separately the Shipments of Prepared Feeds and Concentrates in the year 1948 and to date for the year 1949. Diagram two (page 22) presents the Shipments of Prepared Stocks and Poultry Feeds and Concentrates in total for the year 1948, while diagram three (page 23) presents this same information to date for the year 1949.

Table 1 presents the Total production of Prepared Stock and Poultry Feeds in Canada and also by Economic Areas for the year 1947.

Table 2 shows the 1947 production of Prepared Stock and Poultry Feeds, showing separately the production in the industry proper, the production outside the industry, and the production of the firms included in the Monthly Shipments Survey, and is intended to be useful in indicating relationship in coverage.

Table 3 shows shipments or sales, of each particular feed, or concentrate, reported by the firms in the sample for the months, December, 1948 - December, 1949, without detail of provincial destination.

Table 4 presents the shipments of related groups of feeds or concentrates, by provincial destinations, for the months, October, 1948 - December, 1949.

Tables 5 and 6 show complete detail of feeds and concentrates shipped by provincial destinations, for the months of November, 1949 and December, 1949.

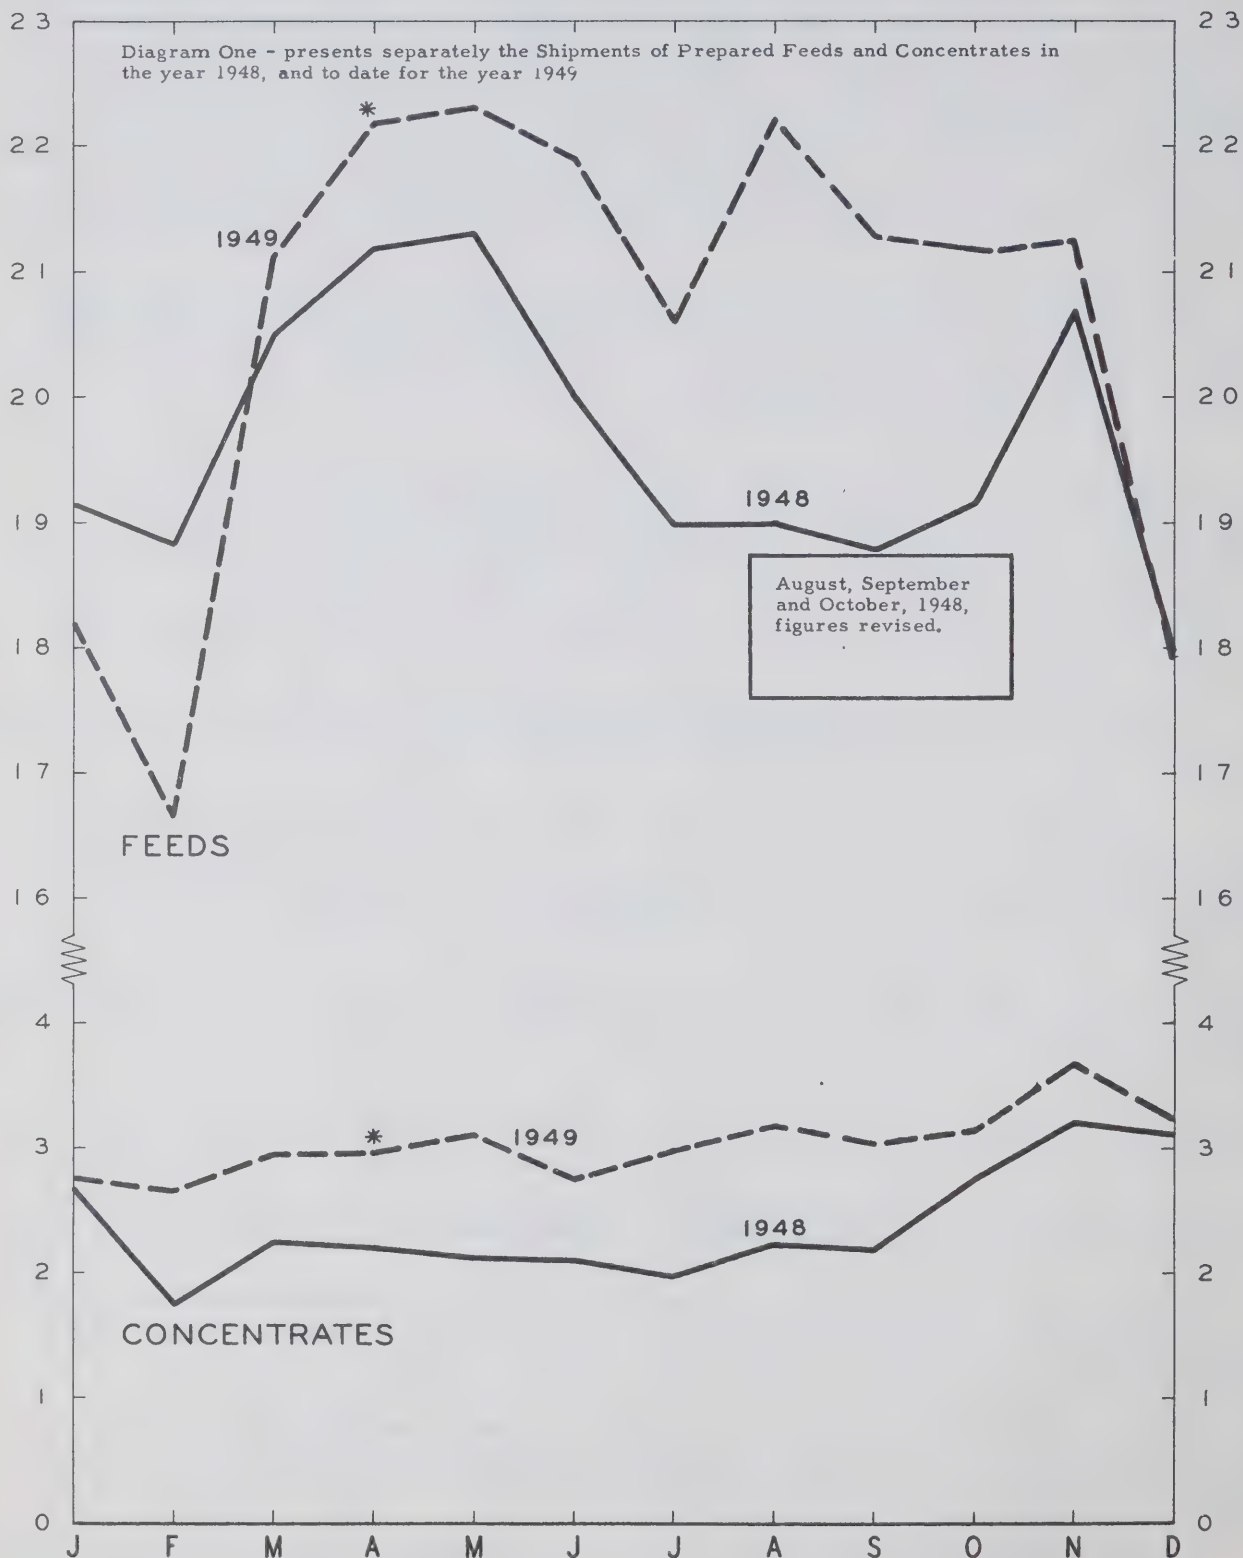

Table 7 shows the stocks of prepared stock and poultry feeds held by all firms reporting in the Monthly Sample Survey, by main groups of feeds and concentrates, for the months of December, 1948 - December, 1949.

Table 8 gives the consumption of grains used in making feeds during individual months, by all firms reporting in the Monthly Sample Survey for the months, September, 1948 - December, 1949.

Table 9 presents the stocks of milk, buttermilk and whey powder, held by all firms classified under the Prepared Stocks and Poultry Feeds Industry for the months, October, 1948 - January, 1950.

MONTHLY SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS AND CONCENTRATES, 1948-1949

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Specifically for the use of our Agricultural Division, data are collected each month on the consumption of grains used in the manufacturing of prepared stock and poultry feeds, during individual months, from ALL firms reporting in the Monthly Sample Survey. It is thought that this information may be of use and interest to Feed Manufacturers, and figures on the consumption of these grains are given in Table 8, immediately below.

Table 8. - Consumption of Grains Used in Making Feeds, During Individual Months, by ALL Firms Reporting in the Monthly Sample Survey, for the Months, August, 1948 - December, 1949.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Supplementary to the Monthly Prepared Stock and Poultry Feeds Survey, and specifically for use by the Department of Agriculture, data are collected each month on the stocks of milk powder, buttermilk powder and whey powder held by Feed Manufacturers. It is thought that the information may be useful to Feed Manufacturers also, and stocks of these items are given in Table 9, immediately following.

However, it must be stressed that the totals do not represent stocks held only by firms reporting in the Sample Monthly Survey of Shipments and Stocks of Prepared Stock and Poultry Feeds, although these particular firms account for a high percentage, but are approximately all stocks of milk powder, etc. held in the Prepared Stock and Poultry Feeds Industry as a whole.

Table 9. - Stocks of Milk Powder, Buttermilk Powder and Whey Powder Held
By All Firms in the Prepared Stock and Poultry Feed Industry
for the months, October, 1948 - January, 1950.
